

Simplified BIN Account Range Table Reference Guide

The Mastercard Simplified BIN Account Range Table contains up-to-date active Mastercard valid issuing account ranges that can be used for authorization routing and fraud prevention purposes. The Simplified BIN Account Range Table available on select mastercard.com sites is intended for use by Mastercard merchants and third-parties. An [API version](#) is available via Mastercard Developers and includes more detailed information. Acquirers and Processors should continue to leverage the existing BIN Table they receive directly from Mastercard.

The following table lists the fields and description of elements in the Simplified BIN Account Range Table available on mastercard.com. The file (a zip of a csv) is refreshed every 24 hours.

Important Note: As BIN account range assignments change on a frequent basis please be sure to retrieve an updated table on a weekly basis, at a minimum, to stay current.

Field Name	Comments/Description
COMPANY NAME	Customer name.
ICA	Mastercard ICA number.
ACCOUNT_RANGE_FROM	Low Primary Account Range (active only). The lowest possible account number that would be identified within this authorization account range.
ACCOUNT_RANGE_TO	High Primary Account Range (active only). The highest possible account number that would be identified within this authorization account range.
BRAND_PRODUCT_CODE	The Brand Product Code associated with the account range.
BRAND_PRODUCT_NAME	The Brand Product Name associated with the account range.
ACCEPTANCE_BRAND	Acceptance Brand (e.g. Mastercard, Cirrus)
COUNTRY	Issuing Country Code. Licensed Country Code associated with the account range.
